

Prompt:

Create a one-page professional resume using the following details:

Name: Rojan Gabriel M. Calipusan

Email: rgmcalipusan@addu.edu.ph

Phone: 00959139411

Education:

Bachelor of Science in Information Technology

Ateneo de Davao University – 2nd Year

Skills:

Python, Java, HTML & CSS, MySQL, Basic Networking

Projects/Experience:

- Student Enrollment System (Python, OOP)
- Shopping System (Console-based program)

Achievements:

- Academic Achiever

Use a clean, modern, and professional format.

Keep it concise and suitable for entry-level IT job applications.

Use clear section headings and bullet points where appropriate.

Output from Chatpgt pro model:

Rojan Gabriel M. Calipusan

Email: rgmcalipusan@addu.edu.ph | Phone: 00959139411

Professional Summary

Motivated and detail-oriented Information Technology student with foundational skills in programming, web development, databases, and networking. Capable of developing simple software applications using Python, Java, HTML/CSS, and MySQL. Seeking an entry-level IT opportunity to apply technical knowledge, strengthen practical skills, and contribute to a professional team environment.

Education

Bachelor of Science in Information Technology
Ateneo de Davao University
2nd Year

Skills

- Python
- Java
- HTML & CSS
- MySQL
- Basic Networking

Projects

Student Enrollment System
Python, Object-Oriented Programming

- Developed a structured enrollment system using object-oriented programming principles.
- Implemented features for managing student records, courses, and enrollment processes.

Shopping System
Console-Based Program

- Created a console-based shopping application for handling product selection and basic transaction flow.
- Applied programming logic, user input handling, and data organization techniques.

Achievements

- Academic Achiever

Output from Deepseek base model:

Rojan Gabriel M. Calipusan
Davao City, Philippines
☎ 00959139411 | ✉ rgmcalipusan@addu.edu.ph

EDUCATION

Bachelor of Science in Information Technology
Ateneo de Davao University
Second Year Standing | Expected Graduation: 2027

- **Relevant Coursework:** Object-Oriented Programming, Database Management Systems, Web Development Fundamentals, Network Principles.

TECHNICAL SKILLS

- **Programming Languages:** Python, Java
- **Web Development:** HTML, CSS
- **Database:** MySQL (Basic Queries, CRUD Operations)
- **Infrastructure:** Basic Networking Concepts (TCP/IP, LAN Setup Fundamentals)

PROJECT EXPERIENCE

Student Enrollment System | *Python (OOP)*

- **Developed a console-based application to simulate student registration and course management.**
- **Implemented core Object-Oriented Programming principles including encapsulation and class inheritance to manage student data and enrollment logic efficiently.**

Shopping System | *Java (Console-Based)*

- **Built an interactive command-line program allowing users to browse a product catalog, add items to a virtual cart, and calculate total costs with tax.**
- **Focused on robust input validation and clean console output formatting to enhance the user experience.**

ACHIEVEMENTS

- **Academic Achiever:** Recognized for maintaining high academic standing within the Information Technology program.

ADDITIONAL COMPETENCIES

- **Languages:** English (Fluent), Filipino (Native)
- **Soft Skills:** Strong analytical thinking, attention to detail in code structure, and collaborative team communication.

Comparison Table		
Criteria	Chatgpt pro model	DeepSeek base model
Structure	Well-organized structure.	Well-organized structure
Clarity	The clarity is good.	The clarity is good
Formatting	Formatting is good. Very clean and readable.	Formatting is good. It also includes some sections that I did not prompt. Clean and readable. But the header section is not the big enough compared to chatgpt
Overall quality	Good and well-structured resume.	Good. But need a little improvement in header section.

Reflection:

After comparing the outputs from ChatGPT and DeepSeek, I noticed several differences in how each LLM generated the resume. ChatGPT produced a more structured and well-structured and clear output, with clear section headings and concise bullet points. The formatting was clean and easy to read, making it suitable for a professional resume. On the other hand, DeepSeek also generated a complete resume, but it was slightly not clear, especially in the header section.

In terms of overall performance, ChatGPT performed better because it followed the instructions more closely and produced a more professional-looking result. The tone was formal and appropriate for an entry-level IT job application. DeepSeek's output was still useful, but it required more editing to make it concise and properly formatted.

When creating my final resume, I combined the strengths of both outputs. I used ChatGPT's structure and formatting as the base, while incorporating some of the descriptive elements from DeepSeek to improve clarity in certain sections. I also refined the wording to make it more concise and ensured that all sections were aligned properly.

This activity taught me that even when using the same prompt, different LLMs can produce noticeably different results. It also showed me the importance of prompt design, as a clear and detailed prompt helps guide the AI toward better outputs. Most importantly, I learned that AI-generated content still needs human judgment and refinement to achieve the best final result.
